

PSYCH 1140 - Thesis statement

Thursday, 3 February 2022

Based on the reading: [Clayton N. S., & Dickinson A. \(1998\). Episodic-like memory during cache recovery by scrub jays. *Nature* 395. 272-274](#)

Part I

As a group, write a 1 paragraph summary of the paper. This summary should include:

- The main claim the authors are making
- The three main evidence that support their claim and the
- The conclusion the authors propose
- What do you think this means for the claim that episodic memory is uniquely human.

GROUP X

Members:

Part II

Read the summary that your peers have written above. As a group, answer the following questions:

Group X

Members:

1. Do you think the other group has sufficiently avoided plagiarism? Why or why not. Be specific in your answer, include examples such as lines of text to support your claim.
2. Do you think that the summary in general is good? Is it sufficiently clear in conveying the claims and evidence the authors in the original article tried to convey? Why or why not?
