

PSYCH1140 - quoting texts

Tuesday, 8 February 2022

Group X

Members:

In this exercise, we are going to closely look at how to properly add text quotations to our write-ups. For this exercise, we're going to consider these texts:

- A. [Brainerd, C.J. & Reyna, V. F. \(2002\). Fuzzy-trace theory and false memory. *Current Directions in Psychological Science*. 11\(5\). 164-169.](#)
- B. [Dodgson, L. \(2017, Dec 19\). *Our brains sometimes create 'false memories' - but science suggests we could be better off this way.* Business Insider.](#)
<https://www.businessinsider.com/science-of-false-memories-2017-12?r=UK&IR=>

I

1. Identify the portion of text in the Business Insider (B) article that talks about the topic of the science article (A). You can highlight/ underline or mark on a copy of the article you have.
2. Pull out the quotes written in the Business Insider article (B). What kind of information is contained within these quotes? For example, are they chunks of text

pulled out from a scientific article? Are they based on something someone said (i.e. part of speech)?

3. Identify one point from the science article that's mentioned in the Business Insider article? How did Lindsay Dodgson (author of the Business Insider article) write about this point?
4. Based on your observation, what would be examples of appropriate usage of quotations in writings about science?
